

INTRODUCTION

EPM Solutions specialise in asset management and engineering project management. Operating from our head office in Paisley, Scotland we work with some of the world's largest companies to help ensure that their assets are properly managed and maintained. As engineering design professionals we also provide our clients with engineering project management services in delivering new build installations and modifications to existing facilities.

4 reasons why EPM Solutions are different

- We are an engineering focused business, which means as well as delivering high quality project management solutions we understand how your assets work.
- We provide independent advice on software, so that you can make an informed judgement as to what package is right for your own specific needs.
- Our **AssetMatrix** system will help determine your asset management strategy.
- We will take care of the all-important detail required to successfully implement an asset maintenance strategy. In other words we 'get our hands dirty.'

OUR PROMISE TO YOU

EPM is a customer focused business with just one simple aim - to ensure your complete satisfaction at all times. To achieve this we promise to:

- Deliver a service that is always positive, flexible and proactive
- Provide engineering solutions that represent exceptional value in the marketplace
- Drive your project to ensure the specification you set is delivered on time and on budget

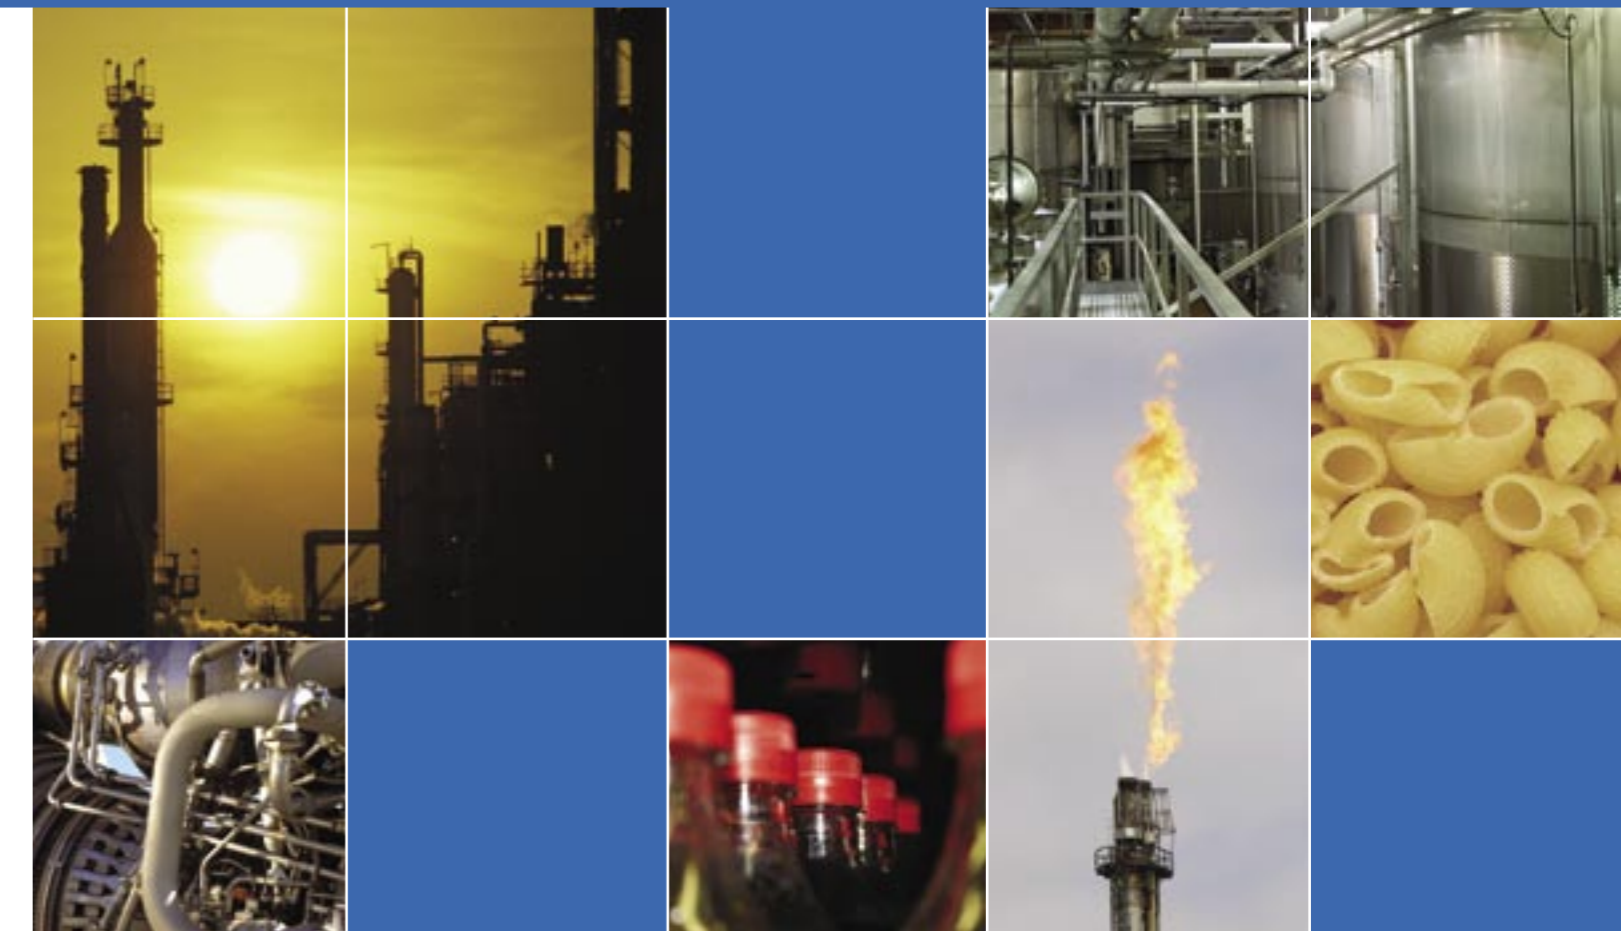

QUALITY OBJECTIVES

- To make certain that our Management System defines the technical processes required in the delivery of our service, and the dissemination of all relevant information throughout the organisation.
- Ensure the Management System satisfies the requirements of ISO 9001: 2000
- Ensure that any service failures are evaluated and appropriate corrective action is taken
- Introduce new and more effective working methods and products as they become available
- Continually develop our team to ensure you receive the best available service and expertise
- Regularly review and monitor your changing needs to ensure all of our procedures are effective in delivering an exceptional service

WHAT WE DO

THE ASSET MATRIX

BENEFITS

EPM Solutions provide a complete end-to-end solution to help asset intensive companies effectively manage and maintain their assets. We achieve this by delivering the expertise and resource to implement every detail of an asset management strategy from site surveys to CMMS implementation and audit. Also, as engineering and project management consultants we can assist you with new build installations and modifications to existing sites.

Maintenance strategy

Using EPM's own AssetMatrix as the starting point we combine the manufacturers recommendations with our own experience, your experience, and the event history and records to produce the strategy and subsequent detail.

Software

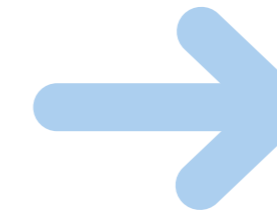

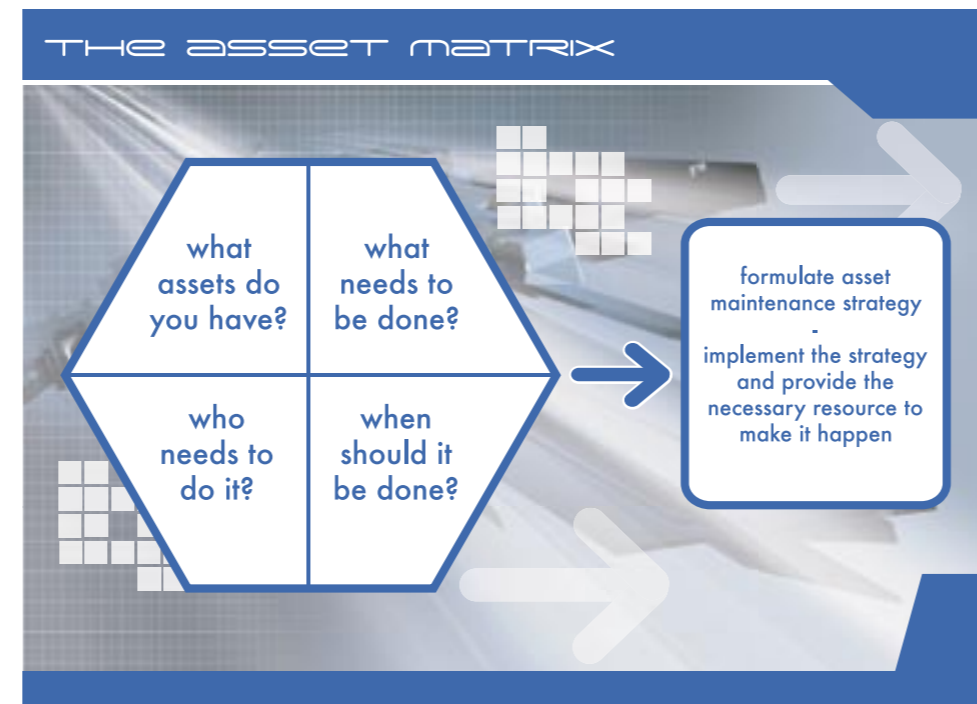

We give independent advice to ensure the right package is selected for your specific needs.

Implementation of the detail

Once the strategy and software is in place we can relieve your resource headache by taking care of the time consuming details such as site surveys, asset registers, database population, identification & tagging and CAD drawings.

Engineering Design & Project Management

EPM can take responsibility for the delivery of your engineering projects from concept to hand over. With particular experience in pumps, pipes and tanks our services include: project design and change management, project planning, specification and procurement. In addition, our CAD design facilities can be utilised to provide added value for your own internal resources.

As an asset management and engineering design company we are able to assist you in the following ways:

Staying 100% compliant with:

Legislation and industry regulations
Manufacturers warranties | HSE

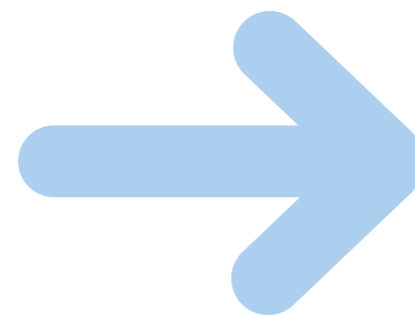

Improving operations:

- Improved safety
- Improved lifetime value of your assets
- Increased return on your asset investments
- Well informed asset related decision making
- Increased productivity
- Reduced costs
- Improved staff knowledge and proactive maintenance culture

The link between properly maintaining our assets and safety in the workplace is an obvious one. That is why we have chosen to work with an asset management specialist like EPM solutions when it comes to ensuring safety compliance at our terminals across the UK.

David Johnston, BP Logistics

The Asset Matrix has been exclusively developed by EPM solutions through the combination of our own expertise and our customers valuable input.

It is a tried and tested method for successfully formulating and implementing asset maintenance strategies. All of our customers have complete access to this unique and highly effective framework.
